Problem Statement #57 – Pet Adoption & Shelter Management System

Use-Case Flow Specification

UC-03: Submit Adoption Application

Pet Adoption & Shelter Management System

**Use Case**

**UC-03 – Submit Adoption Application**

**Primary Actor**

**Adoption Applicant**

**Preconditions**

1. The applicant can access the Pet Adoption & Shelter Management System.
2. The selected animal exists in the system.
3. The selected animal is available for adoption.
4. The applicant has the information required to complete the application.

**Postconditions**

1. The adoption application is stored in the system.
2. The application is linked to the applicant.
3. The application is linked to the selected animal.
4. The application status is set to **Pending Review**.
5. Shelter staff can review the submitted application.

---

**Main Success Scenario**

1. The applicant opens the Pet Adoption & Shelter Management System.

2. The applicant searches for available animals.
  3. The system displays matching available animals.
  4. The applicant selects an animal and views its details.
  5. The applicant selects **Submit Adoption Application**.
  6. The system displays the adoption application and screening questionnaire.
  7. The applicant enters the required information.
  8. The system validates the entered information.
  9. The system links the application to the selected animal.
  10. The system stores the application.
  11. The system changes the application status to **Pending Review**.
  12. The system displays an application-submitted confirmation.
  13. The use case ends successfully.
- 

#### **Alternate Flow — Incomplete Application**

- A1. The applicant attempts to submit the application without completing a mandatory field.
- A2. The system identifies the missing information.
- A3. The system displays a message asking the applicant to complete the missing information.
- A4. The applicant enters the missing information.
- A5. The system validates the application again.
- A6. If all mandatory information is valid, the system stores the application and changes its status to **Pending Review**.
